

# 论文写作指导

廖清、漆舒汉

计算机科学与技术学院

哈尔滨工业大学(深圳)

### 课程简介

- 1. 任课老师: 廖清、漆舒汉
  - 信息楼1705和1703室
  - liaoqing@hit.edu.cn
  - shuhanqi@cs.hitsz.edu.cn
- 2. 参考教材及课程
  - 研究生学术道德与学术规范百问,复旦大学出版社
  - 如何写好研究生学位论文,哈工大徐文福
  - 研究生如何造就优秀的学术论文,清华大学高飞飞
  - Stanford: Writing in the Sciences
  - 本课程考核制度

### 教学目标、设计及课程安排

### 课程目的就是要解决学生们以下疑问:

- 为什么要学习这门课程? 我能从本门课程学到什么?
- 什么是研究生的能力建设?
- 如何训练科研和学术论文写作能力?
- 如何撰写符合哈工大写作规范的学位论文
- 什么是学术道德规范? 如何避免学术不端?

### 教学目标、设计及课程安排

### 理论指导

哈工大学术/学位论文写作及答辩

- 共计8学时
- 从选题、写作内容、答辩三方面进行理 论指导

哈工大学位论文写作规范 &学术道德规范指导

- 共计8学时
- 从格式规范和道德规范两方面进行理 论指导

### 案例讨论

#### 优硕博案例

#### 摘·要

高压输电线路的巡检是确保电网安全运行的必要作业任务,对现代电力社会具有重要的影响。传统的巡检主要靠人工巡检和直升机巡检,存在着安全性差、范围小、成本高、效率低等问题,用高压巡检机器人巡检代替传统巡检方式可以有效弥补上述不足。目前的巡检机器人存在体积质量大、越障时间长、适应性差等问题,本课题为解决这些<u>缺点,设计了一种新型开合式</u>

(原标题: 期刊学术不端行为界定出台国家标准, 专家解读三大亮点)

4

近年来,剩窃、伪造、篡改等类型的学术不磁行为时有发生,从罹天临论文作假 到满南大学硕士生毕业论文抄袭,再到107篇论文涉嫌同行评议造假被撤稿,如何才 龄景制学术不进行为2 什么才是最准确的学术不进行完标准?

2019年7月1日,学术出版界迎来了首个行业标准——《学术出版规范——期刊 学术不議行为界定(CY/T174—2019)》(以下简称《标准》)。正式实施的《标 准》,界定了学术期刊论文作者、审稿专家、编辑者所可能涉及的学术不端行为,适 用于学术期刊论文出版过程中各类学术不端行为的判断和处理。《中国科学报》采访 了多位专家、对《版律》系点内容进行解读。

亮点一: 首次针对学术不端行为的国家标准

国家出台学术不端行为标准

### 哈工大学术论文写作及答辩

\*

◆ 哈工大学术/学位论文写作及答辩

- 一、基本常识与基本要求
- 二、学术/学位论文的逻辑思路与框架
- 三、如何写好学术/学位论文
- 四、如何做好会议汇报/学位答辩

### 上半章

哈工大学术/学位论文写作及答辩廖清

### 1. 论文撰写流程

论文章节	撰写顺序	备注
摘要 (Abstract)	5	最后写,突出成果、意义
引言 (Introduction)	4	获得满意结果,可以开始撰写
相关工作(Related Work)	4	获得满意结果,可以开始撰写
方法 (Method)	1	基本确定数学模型就可以开始撰写, 跑实验时可以继续完善, <b>需要不停修</b> 改, 花费时间最多的部分
实验 (Experiments)	2	跑实验时开始撰写,先介绍数据集、实验设置、规划实验方向
结论 (Conclusion)	3	获得满意结果,可以开始撰写

#### 1. 论文撰写流程

- 一篇论文至少大改3遍,一般5-6遍的论文修改
- 初稿,只是把内容写出来,基本没法看
- 第二遍,逐句修改,每一句话的用词都要斟酌
- 第三遍,通读全文,确保逻辑通顺,修改语病
- 可以进行投稿,等待评审意见
- 补实验,完善模型,增加讨论
- · 第四遍,隔一段时间重读论文,再进行大改

#### 2. 撰写学术论文需要注意的地方

初学者也能够自己解决的错误

• 一个句子中出现多个谓语

Background models, which can represent the speakerindependent distribution of features is very important in modern SV systems. And training background models for a spe-

- 单复数错误
- 参考文献格式错误: Google, Baidu 找的Bibtex 格式有错误,需要自己手动修改,根据选定的期刊、会议进行文献格式统一。

[作者、标题、刊物/会议名称、卷号、页数、月份、年份]

#### 2. 撰写学术论文需要注意的地方

论文写作的四个目标:

- 清晰 (Clear): 看得懂
- 有针对性(Objective): 每句话要有目的性,不是废话
- 精准 (Accurate): 描述事物要精准
- 简明 (Concise): 句式要短

复杂的idea不一定要用复杂的语言,让读者enjoy to read

句子越长越看不懂

一篇文章,句子的平均长度一般在12-17字左右较为合适。

#### 3. 撰写学术论文的铁律

不要冗余:初写者容易把论文写的又长又难懂

- 段落和逻辑冗余
  - 一个或多段话如果能合成一段,且不影响意思表达就合成一段
- 句子冗余
  - 如果删掉之后,不影响整个句子的表达,这个词就是多余的

I have only made this letter rather long because I have not had time to make it shorter -Lettres provinciales, 1965

#### 3. 撰写学术论文的铁律

#### ▶ 论文写作-不要冗余

Speaker Verification (SV) is widely and successfully used in many applications (e.g., user identification), which needs higher levels of security and flexibility. SV aims to verify whether a speech input corresponds to a specific speaker, based on the speaker's known utterances.

Background models, which can represent the speaker-independent distribution of features, are very important in modern SV systems. And training background models for a specific user typically consumes a large amount of speaker data from different speakers. The traditional method for training an efficient background model for SV is conventional user-server based speaker verification, where user data are aggregated and utilized on centralized servers. This mean that the server has the access to speech patterns of all users' who participate, which is ripe with privacy risks. The privacy problem in SV should be paid more attention than in the traditional method of authentication because speech pattern is non-revocable, and privacy compromised. Regulations, e.g., EU General Data Protection Regulation (GDPR), preclude uploading speech data of speakers to a server and utilizing them in a centralized approach. Thus, SV faces two challenges: data scarcity and data privacy.

Speaker verification aims to verify whether a speech belongs to a specific speaker based on speakers' utterances. However, traditional speaker verification systems require to collect a large amount of user data from multiple mobile clients to train an efficient speaker verification model in a center server. With the General Data Protection Regulation(GDPR), California Consumer Privacy Act(CCPA) and China's Cyber Security Law have been proposed by European Union, United States and China, respectively. It becomes illegal to aggregate speakers' records and train a speaker verification model in a third-party due to patterns of speakers are sensitive and private. Therefore, existing speaker verification models face data scarcity and privacy leakage problem.

185个字,两段话

109个字,一段话

#### 3. 撰写学术论文的铁律

#### ▶ 论文写作-不要冗余

"This paper provides a review of the basic tenets of cancer biology study design, using as example studies that illustrate the methodologic challenges or that demonstrate successful solution to the difficulties inherent in biological research."

"This paper provides a review of the basic tenets of cancer biology study design, using as example studies that illustrate the methodologic challenges or that demonstrate successful solution to the difficulties inherent in biological research."

"This paper reviews cancer biology study design, using examples that illustrate specific challenges and solutions."

#### 3. 撰写学术论文的铁律

▶ 论文写作-不要冗余

"Anti-inflammatory drugs may be protective for the occurrence of Alzheimer's Disease."

"Anti-inflammatory drugs may be protective for the occurrence of Alzheimer's Disease."

protect against

"Anti-inflammatory drugs may protect against Alzheimer's Disease."

#### 3. 撰写学术论文的铁律

▶ 论文写作-不要冗余

"The expected prevalence of mental retardation, based on the assumption that intelligence is normally distributed, is about 2.5%"

"The expected prevalence of mental retardation, based on the assumption that intelligence is normally distributed, is about 2.5%"

"The expected prevalence of mental retardation, if intelligence is normally distributed, is about 2.5%."

#### 3. 撰写学术论文的铁律

#### ▶ 论文写作-不要冗余

#### 长版

A majority of
A number of
Are of the same opinion
Less frequently occurring
All three of the
Due to the fact that
Give rise to

Have an effect on

#### 短版

most
many
agree
rare
the three
because
cause
affect

#### 3. 撰写学术论文的铁律

▶ 论文写作-不要冗余

#### 信息量很少的句子

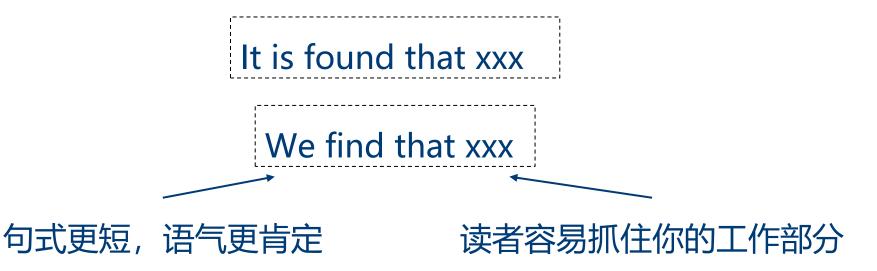

As it is well known
As it has been shown
It can be regarded that
It should be emphasized that
Basic tenets of

#### 信息量很少的副词

Very, really, quite, basically, generally, etc.

#### 4. 撰写学术论文的一般性建议

- ▶ 论文写作-少用被动语态(不是不用)
- 主动语态可以缩短句子长度,并且使读者更感兴趣

#### 4. 撰写学术论文的一般性建议

- ▶ 论文写作-少用否定词组
- 句子更短,语义更直接

Not honest

Not harmful

Not important

Does not have

Did not remember

Did not pay attention to

Did not succeed

Dishonest

Safe

Unimportant

Lacks

Forgot

Ignored

failed

#### 4. 撰写学术论文的一般性建议

- > 论文写作-少用否定词组
- 句子更短,语义更直接

She was not often right.

She was usually wrong.

She did not want to perform the experiment incorrectly.

She wanted to perform the experiment incorrectly.

#### 4. 撰写学术论文的一般性建议

➤ 论文写作-减少不必要的 "There are/there is"

There are many ways in which we can arrange the xx

We can arrange the xx in many ways

用这种句式要 注意不要出现 多个谓词 There are many researchers who like to write

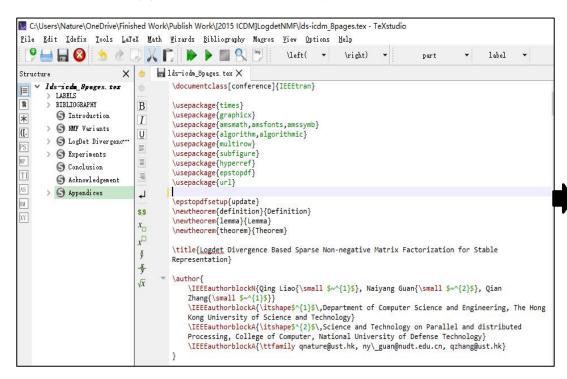

Many researchers like to write

The data confirm that there is an association between xx and xx.

The data confirm an association between xx and xx.

#### 5. 撰写学术论文其他注意事项

#### 论文写作-必备工具

#### Logdet Divergence Based Sparse Non-negative Matrix Factorization for Stable Representation

Qing Liao <sup>1</sup>, Naiyang Guan <sup>2</sup>, Qian Zhang <sup>1</sup>

<sup>1</sup>Department of Computer Science and Engineering, The Hong Kong University of Science and Technology

<sup>2</sup> Science and Technology on Parallel and distributed Processing, College of Computer, National University of Defense Technology quature@ust.hk, ny\_guan@nudt.edu.cn, qzhang@ust.hk

```
\begin{equation}\label{eq:5}
\mathop{\min}\limits_{W\in{\rm{R}}_+^{m\times r}, H\in{\rm{R}}_+^{r\times}
n}}\sum\limits_{i=1}^m{\sum\limits_{j=1}^n{(1-g({X_{ij}}-\sum\limits_{k=1}^K{{U_{ik}}{V_{jk}},\sigma}))}},
\end{equation}
```

$$\min_{W \in \mathbb{R}_{+}^{m \times r}, H \in \mathbb{R}_{+}^{r \times n}} \sum_{i=1}^{m} \sum_{j=1}^{n} \left(1 - g(X_{ij} - \sum_{k=1}^{K} U_{ik} V_{jk}, \sigma)\right), (5)$$

#### 5. 撰写学术论文其他注意事项

论文写作-三大要素

不会因为语法拒稿,一定会因为逻辑拒稿

#### 5. 撰写学术论文其他注意事项

论文写作-结果展示很重要

- > 每个实验结果都要有解释和结论,反常现象要讨论
- ▶ 根据你想要展示的重点,有意识的选择更美观和直观的方式 展示图表
- ▶ 展示结果需多样性

#### 5. 撰写学术论文其他注意事项

论文写作-文字处理

- ▶ 新在哪:新材料、新现象、新方法、新原理、系统集成、组合借鉴
- > 实验有讨论,结果有提升
- > 无法解释的部分,进行合理假设
- ▶ 找几篇可以借鉴的文章风格,进行模仿
- > 反复修改

### 6. 投稿注意事项

- 找发表过和你相关论文的会议和期刊,调研期刊和会议 接收情况
- ▶ 返修很正常,认真对待审稿人的意见,审稿人提出的任何问题都不能回避和忽略,对待审稿人态度尊敬
- ➤ Cover Letter: 强调创新性
- ➤ Conflicts: 审稿人不要是同单位或者是你的合作者

#### 8. 撰写学术论文需要不停的训练

论文写作训练

- ▶ 针对逻辑、语气、语法不停的修改,让自己的文章目的 地更强
- ▶ 硕士期间能够自己撰写论文的次数不多,不论写的多差,都要抓住机会锻炼
- ▶ 博士生要把论文写作训练成一种本能
